

Occludin (OCLN) (Tight Junctions Marker) Antibody

Mouse Monoclonal Antibody [Clone OCLN/2183]

Size	Format	Catalog No
200ug/ml	Purified Ab with BSA and Azide	100506658-MSM3-P0
200ug/ml	Purified Ab with BSA and Azide	100506658-MSM3-P1
1.0mg/ml	Purified Ab WITHOUT BSA and Azide	100506658-MSM3-P1ABX
 1.0mg/ml		

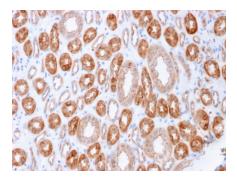

Applications	Tested Dillution
Immunohistochemistry (IHC)	1-2ug/ml

Product Details

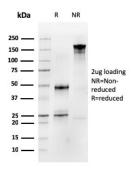

OCLN
OCEN
Recombinant human Occludin fragment around aa 282-415 (Exact sequence is proprietary)
Mouse
Monoclonal
IgG1 / Kappa
60-82kDa
Cell junction, Cell membrane, Tight junction
Human
HepG2 cells. Kidney.
6

*Optimal dilution for a specific application should be determined.

Product Images for Occludin (OCLN) (Tight Junctions Marker) Antibody

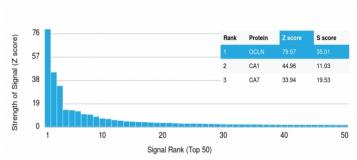

Formalin-fixed, paraffin-embedded human Kidney stained with Occludin Mouse Monoclonal Antibody (OCLN/2183).

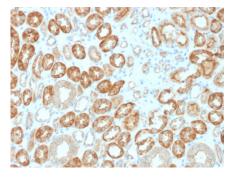

SDS-PAGE Analysis of Purified Occludin Mouse Monoclonal Antibody (OCLN/2183). Confirmation of Integrity and Purity of Antibody.

Analysis of Protein Array containing more than 19,000 full-length human proteinsusing Occludin Monospecific Mouse Monoclonal Antibody (OCLN/2183).Z- and S- Score: The Z-score represents the strength of a signal that a monoclonal antibody (MAb) (in combination with a fluorescently-tagged anti-IgG secondary antibody) produces when binding to a particular protein on the HuProtTM array. Z-scores are described in units of standard deviations (SD's) above the mean value of all signals generated on that array. If targets on HuProtTM are arranged in descending order of the Z-score, the S-score is the difference (also in units of SD's) between the Z-score. S-score therefore represents the relative target specificity of a MAb to its intended target. A MAb is considered to specific to its intended target, if the MAb has an S-score of at least 2.5. For example, if a MAb binds to protein X with a Z-score of 43 and to protein Y with a Z-score of 14, then the S-score for the binding of that MAb to protein X is equal to 29.

Formalin-fixed, paraffin-embedded human Kidney stained with Occludin Mouse Monoclonal Antibody (OCLN/2183).

Specificity & Comments

Occludin is a tetraspan integral membrane protein in epithelial and endothelial tight junction (TJ) structures that can contain two extracellular loops. The protein exists in a variety of phosphorylated forms. Phosphorylation is involved in regulating both the localization and the function of Occludin. Expression of Occludin is upregulated by polyunsaturated fatty acids, increasing trans-endothelial cell resistance and reducing cellular permeability to large molecules. The level of Occludin varies greatly depending on tissue; in brain tissue, Occludin is highly expressed at cell-cell contact sites. Nonneural tissues show lower expression and discontinuous distribution. Up-regulation of epithelial Occludin may play a role in enhancing paracellular permeability and be related to the damage to the tight junction.

Research Areas

BBB VCAM-1 Signaling, Transcription Factors

Known Applications & Suggested Dilutions

Immunohistochemistry (Formalin-fixed) (1-2ug/ml for 30 minutes at RT)(Staining of formalin-fixed tissues requires heating tissue sections in 10mM Tris with 1mM EDTA, pH 9.0, for 45 min at 95°C followed by cooling at RT for 20 minutes) | Optimal dilution for a specific application should be determined.

Limitations and Warranty

This antibody is available for research use only and is not approved for use in diagnosis.

There are no warranties, expressed or implied, which extend beyond this description. Company is not liable for any personal injury or economic loss resulting from this product.

Supplied As

200ug/ml of Ab Purified from Bioreactor Concentrate by Protein A/G. Prepared in 10mM PBS with 0.05% BSA & 0.05% azide. Also available WITHOUT BSA & azide at 1.0mg/ml.

Storage and Stability

Antibody with azide - store at 2 to 8° C. Antibody without azide - store at -20 to -80°C. Antibody is stable for 24 months. Non-hazardous. No MSDS required.
