

Clusterin / Apolipoprotein J (APO-J) Antibody

Mouse Monoclonal Antibody [Clone CLU/4721]

Catalog No	Format	Size
1191-MSM1-P0	Purified Ab with BSA and Azide at 200ug/ml	20 ug
1191-MSM1-P1	Purified Ab with BSA and Azide at 200ug/ml	100 ug
1191-MSM1-P1ABX	Purified Ab WITHOUT BSA and Azide at 1.0mg/ml	100 ug

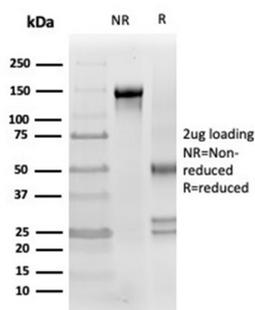

Applications	Tested Dillution	Note
Immunohistochemistry (IHC)	1-2ug/ml	30 min at RT. Staining of formalin-fixed tissues requires heating tissue sections in 10mM Tris with 1mM EDTA, pH 9.0, for 45 min at 95°C followed by cooling at RT for 20 minutes

Product Details

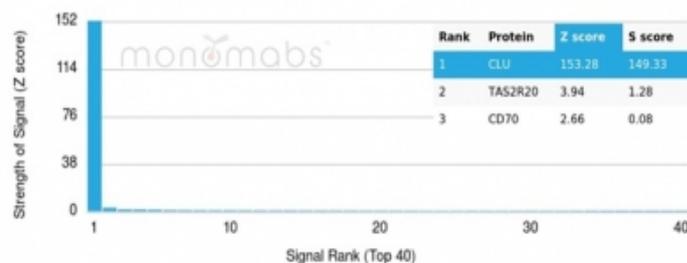

Clone	CLU/4721
Gene Name	CLU
Immunogen	Recombinant fragment (around aa150-300) of human CLU protein (exact sequence is proprietary)
Host	Mouse
Clonality	Monoclonal
Isotype / Light Chain	IgG2c / Kappa
Mol. Weight of Antigen	70kDa (precursor); 36-39kDa (α¼ ^a); 34-36kDa (α ^o ¼)
Cellular Localization	Cytoplasm, Secreted
Species Reactivity	Human
Positive Control	Human pancreas, tonsil or cervix.

*Optimal dilution for a specific application should be determined.

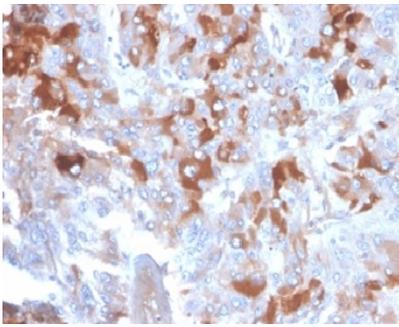

Product Images for Clusterin / Apolipoprotein J (APO-J) Antibody

SDS-PAGE Analysis of Purified Clusterin / APOJ Mouse Monoclonal Antibody (CLU/4721). Confirmation of Purity and Integrity of Antibody.

Analysis of Protein Array containing more than 19,000 full-length human proteins using Monospecific to Clusterin / APOJ Mouse Monoclonal Antibody (CLU/4721). Z- and S-Score: The Z-score represents the strength of a signal that a monoclonal antibody (MAb) (in combination with a fluorescently-tagged anti-IgG secondary antibody) produces when binding to a particular protein on the HuProt™ array. Z-scores are described in units of standard deviations (SD's) above the mean value of all signals generated on that array. If targets on HuProt™ are arranged in descending order of the Z-score, the S-score is the difference (also in units of SD's) between the Z-score. S-score therefore represents the relative target specificity of a MAb to its intended target. A MAb is considered to be specific to its intended target, if the MAb has an S-score of at least 2.5. For example, if a MAb binds to protein X with a Z-score of 43 and to protein Y with a Z-score of 14, then the S-score for the binding of that MAb to protein X is equal to 29.

Formalin-fixed, paraffin-embedded human adrenal gland stained with Clusterin / APOJ Mouse Monoclonal Antibody (CLU/4721).

Specificity & Comments

Clusterin, also designated complement lysis inhibitor (CLI), apolipoprotein J (APOJ), sulfated glycoprotein 2 (SGP2), SP40 and testosterone-repressed prostate message 2 (TRPM2), is a secretory, heterodimeric glycoprotein that influences immune regulation, cell adhesion, transformation, lipid transportation, tissue remodeling, membrane recycling and cell-cell interactions. Clusterin is synthesized as a 449 amino acid polypeptide that is post-translationally cleaved at an internal bond between Arg 227 and Ser 228. Two subunits, α and β , are associated through disulfide bonds. The α subunit (also called ApoJ α) corresponds to residues 23-227. The β subunit (also called ApoJ β) corresponds to residues 228-449. Overexpression of Clusterin appears to be more common in late stages of mammary tumor progression. Clusterin markedly influences β -Amyloid structure and neuritic toxicity in vivo and may influence Alzheimer's pathogenesis.

Limitations and Warranty

This antibody is available for research use only and is not approved for use in diagnosis. There are no warranties, expressed or implied, which extend beyond this description. Company is not liable for any personal injury or economic loss resulting from this product.

Supplied As

200ug/ml of Ab purified from Bioreactor Concentrate by Protein A/G. Prepared in 10mM PBS with 0.05% BSA & 0.05% azide. Also available WITHOUT BSA & azide at 1.0mg/ml.

Storage and Stability

Antibody with azide - store at 2 to 8 °C. Antibody without azide - store at -20 to -80 °C. Antibody is stable for 24 months. Non-hazardous. No MSDS required.

Research Areas

Cardiovascular, Complement System, Immunology, Neuroscience
