

Recombinant Catenin, beta (p120) Antibody

Mouse Monoclonal Antibody [Clone rCTNNB1/2173]

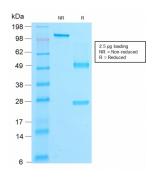

Catalog No	Format	Size
1499-MSM13-P0	Purified Ab with BSA and Azide	200ug/ml
1499-MSM13-P1	Purified Ab with BSA and Azide	200ug/ml
1499-MSM13-P1ABX	Purified Ab WITHOUT BSA	1.0mg/ml

Applications	Tested Dillution
Immunofluorescence (IF)	1-3ug/ml
Immunohistochemistry (IHC)	1-2ug/ml
Western Blot (WB)	2-4ug/ml

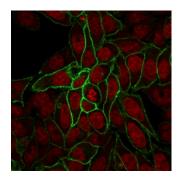

Product Details	
Clone	rCTNNB1/2173
Gene Name	CTNNB1
lmmunogen	Recombinant full-length human '-catenin protein
Host	Mouse
Clonality	Monoclonal
sotype / Light Chain	IgG1 / Kappa
Mol. Weight of Antigen	92kDa
Cellular Localization	Adherens junction, Cell junction, Cell membrane, Centrosome, Cilium basal body, Cytoplasm, Cytoskeleton, Microtubule organizing center, Nucleus, Spindle pole, Synapse
Species Reactivity	Human, Mouse, Rat
Positive Control	HeLa or MCF-7 cells. Breast carcinoma.

^{*}Optimal dilution for a specific application should be determined.

Product Images for Recombinant Catenin, beta (p120) Antibody

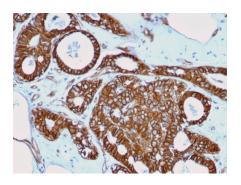

Confocal Immunofluorescence image of HeLa cells using Beta-Catenin Mouse Recombinant Monoclonal Ab (rCTNNB1/2173). Green (CF488) and Reddot is used to label the nuclei.

Western Blot Analysis of HeLa cell lysate using Beta-Catenin Mouse Recombinant Monoclonal Ab (rCTNNB1/2173

Formalin-fixed, paraffin-embedded human Breast Cancer stained with Beta-Catenin Mouse Recombinant Monoclonal Ab (rCTNNB1/2173).

Specificity & Comments

Beta-catenin associates with the cytoplasmic portion of E-cadherin, which is necessary for the function of E-cadherin as an adhesion molecule. In normal tissues, beta-catenin is localized to the membrane of epithelial cells, consistent with its role in the cell adhesion complex.

Research Areas

Apoptosis, Autophagy, Breast Cancer, Cancer, Cardiovascular, Developmental Biology, Immunology, Basal Cell Marker, BBB VCAM-1 Signaling, Colon Cancer, Infectious Disease, Signal Transduction, Transcription Factors

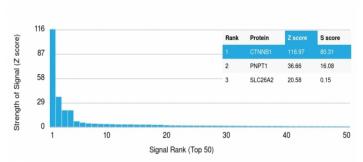

Known Applications & Suggested Dilutions

Immunofluorescence (1-2ug/ml) | Western Blot (1-2ug/ml) | ,Immunohistochemistry (Formalin-fixed) (1-2ug/ml for 30 minutes at RT),(Staining of formalin-fixed tissues requires heating tissue sections in 10mM Tris with 1mM EDTA, pH 9.0, for 45 min at 95°C followed by cooling at RT for 20 minutes),Optimal dilution for a specific application should be determined.

Limitations and Warranty

This antibody is available for research use only and is not approved for use in diagnosis.

There are no warranties, expressed or implied, which extend beyond this description. Company is not liable for any personal injury or economic loss resulting from this product.

Analysis of Protein Array containing >19,000 full-length human proteins using Beta-Catenin Mouse Recombinant Monoclonal Antibody (rCTNNB1/2173) Z- and S- Score: The Z-score represents the strength of a signal that a monoclonal antibody (MAb) (in combination with a fluorescently-tagged anti-IgG secondary antibody) produces when binding to a particular protein on the HuProtTM array. Z-scores are described in units of standard deviations (SD?s) above the mean value of all signals generated on that array. If targets on HuProtTM are arranged in descending order of the Z-score, the S-score is the difference (also in units of SD?s) between the Z-score. S-score therefore represents the relative target specificity of a MAb to its intended target. A MAb is considered to specific to its intended target, if the MAb has an S-score of at least 2.5. For example, if a MAb binds to protein X with a Z-score of 43 and to protein Y with a Z-score of 14, then the S-score for the binding of that MAb to protein X is equal to 29.

Supplied As

200ug/ml of Ab Purified from Bioreactor Concentrate by Protein A/G. Prepared in 10mM PBS with 0.05% BSA & 0.05% azide. Also available WITHOUT BSA & azide at 1.0mg/ml.

Storage and Stability

Antibody with azide - store at 2 to 8°C. Antibody without azide - store at -20 to -80°C. Antibody is stable for 24 months. Non-hazardous. No MSDS required.
