

beta Amyloid Antibody

Mouse Monoclonal Antibody [Clone APP/3343]

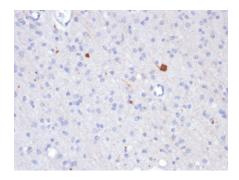

Catalog No	Format	Size
351-MSM3-P0	Purified Ab with BSA and Azide at 200ug/ml	20 ug
351-MSM3-P1	Purified Ab with BSA and Azide at 200ug/ml	100 ug
351-MSM3-P1ABX	Purified Ab WITHOUT BSA at 1.0mg/ml	100 ug

Applications	Tested Dillution	Note
Immunohistochemistry (IHC)	1-2ug/ml	30 min at RT. Staining of formalin-fixed tissues requires heating tissue sections in 10mM Tris with 1mM EDTA, pH 9.0, for 45 min at 95°C followed by cooling at RT for 20 minutes

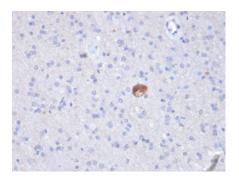

Product Details		
Clone	APP/3343	
Gene Name	APP	
Immunogen	Recombinant fragment (around aa578-680) of human Amyloid Beta protein (exact sequence is proprietary)	
Host	Mouse	
Clonality	Monoclonal	
Isotype / Light Chain	IgG2b / Kappa	
Mol. Weight of Antigen	4-46kDa (å°¾-Amyloid); 100-125kDa (Amyloid A4)	
Cellular Localization	Cell membrane, Cell projection, Cell surface, Clathrin-coated pit, Cytoplasm, Cytoplasmic vesicle, Early endosome, Endoplasmic reticulum, Golgi apparatus, Growth cone, Membrane, Nucleus, Perikaryon, Secreted	
Species Reactivity	Human	
Positive Control	Alzheimer's disease brain. Amyloidosis.	

^{*}Optimal dilution for a specific application should be determined.

Antibody (APP/3343). Confirmation of Purity and Integrity of SDS-PAGE Analysis of Purified Beta Amyloid Mouse Monoclonal Antibody.

Specificity & Comments

Proteolytic cleavage of the Amyloid protein precursor (APP) gives rise to the ?-Amyloid and Amyloid A4 proteins, which are present in human platelets. Amyloid deposition is associated with type II diabetes, Down syndrome and a variety of neurological disorders, including Alzheimer s disease. The Amyloid precursor protein (APP) undergoes alternative splicing, resulting in several isoforms. Proteolytic cleavage of APP leads to the formation of the 4 kDa Amyloid ?/A4 Amyloid protein. This protein is involved in the formation of neurofibrillary tangles and plaques that characterize the senile plaques of Alzheimer s patients. APLP1 (Amyloid precursor-like protein 1) and APLP2 are structurally similar to APP. Human APLP2 is a membrane-bound sperm protein that contains a region highly homologous to the transmembrane-cytoplasmic domains of APP found in brain plaques of Alzheimer s disease patients.

Supplied As

200ug/ml of Ab purified from rabbit anti-serum by Protein A. Prepared in 10mM PBS with 0.05% BSA & 0.05% azide. Also available WITHOUT BSA at 1.0mg/ml.

Storage and Stability

Antibody with azide - store at 2 to 8 °C. Antibody without azide - store at -20 to -80 °C. Antibody is stable for 24 months. Non-hazardous. No MSDS required.

Research Areas

Cardiovascular, Immunology, Neuroscience, Cytokine Signaling, Defective Intrinsic Apoptosis, Infectious Disease, Ovarian Cancer, Signal Transduction

Limitations and Warranty

This antibody is available for research use only and is not approved for use in diagnosis. There are no warranties, expressed or implied, which extend beyond this description. Company is not liable for any personal injury or economic loss resulting from this product.
