SDS-PAGE Analysis of Purified MUC2 Mouse Monoclonal Antibody (SPM513). Confirmation of Integrity and Purity of Antibody

Formalin-fixed, paraffin-embedded human colon stained with MUC2 Mouse Monoclonal Antibody (SPM513).

**Specificity & Comments**

Recognizes a single glycoprotein of 520kDa, identified as mucin 2 (MUC2). This MAb shows no cross-reaction with human milk fat globule membranes, MUC1, or MUC3. Its epitope has been defined as GTQTP (GlyThrGlnThrPro). Mucins are high molecular weight glycoproteins, which constitute the major component of the mucus layer that protects the gastric epithelium. MUC2 is specifically expressed in goblet cells of the small intestine & colon; in about 65% of colonic carcinomas and about 40% of gastric carcinomas. MUC2 is rarely expressed outside of the GI tract with the exceptions of mucinous carcinoma of breast and clear cell-type carcinomas of the ovary.
