FGF23 (Fibroblast Growth Factor 23) Antibody

Mouse Monoclonal Antibody [Clone FGF23/4166]

Catalog No	Format	Size
8074-MSM6-P0	Purified Ab with BSA and Azide at 200ug/ml	20 ug
8074-MSM6-P1	Purified Ab with BSA and Azide at 200ug/ml	100 ug
8074-MSM6-P1ABX	Purified Ab WITHOUT BSA and Azide at 1.0mg/ml	100 ug

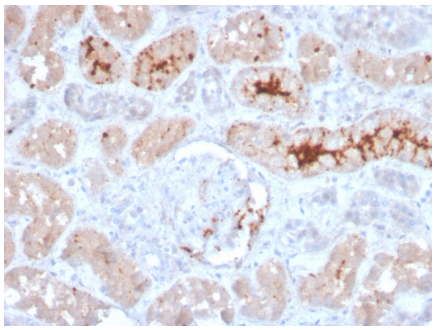

Applications	Tested Dillution	Note
Immunohistochemistry (IHC)	1-2ug/ml	30 min at RT. Staining of formalin-fixed tissues requires heating tissue sections in 10mM Tris with 1mM EDTA, pH 9.0, for 45 min at 95°C followed by cooling at RT for 20 minutes

Product Details

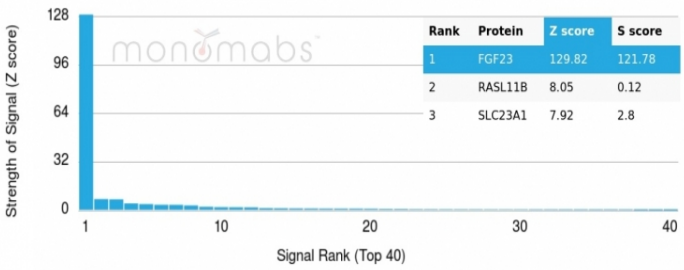

Clone	FGF23/4166
Gene Name	FGF23
Immunogen	Recombinant fragment (around aa25-251) of human FGF23 protein (exact sequence is proprietary)
Host	Mouse
Clonality	Monoclonal
Isotype / Light Chain	IgG2a / Kappa
Mol. Weight of Antigen	12-32kDa
Cellular Localization	Secreted
Species Reactivity	Human
Positive Control	Human kidney tissue.

**Optimal dilution for a specific application should be determined.*

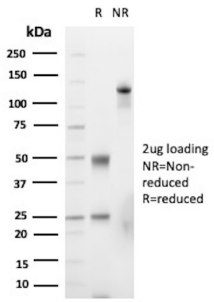

Product Images for FGF23 (Fibroblast Growth Factor 23) Antibody

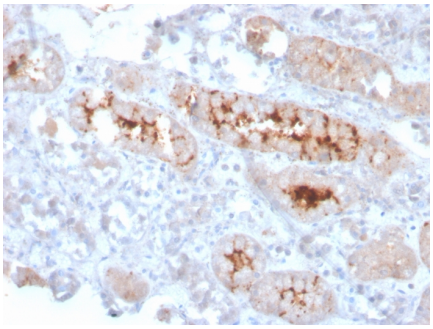

Formalin-fixed, paraffin-embedded human kidney stained with FGF23 Mouse Monoclonal Antibody (FGF23/4166).

Analysis of Protein Array containing more than 19,000 full-length human proteinsusing FGF23 Mouse Monoclonal Antibody (FGF23/4166). Z- and S- Score: The Z-score represents the strength of a signal that a monoclonal antibody (MAb) (in combination with a fluorescently-tagged anti-IgG secondary antibody) produces when binding to a particular protein on the HuProtTM array. Z-scores are described in units of standard deviations (SD's) above the mean value of all signals generated on that array. If targets on HuProtTM are arranged in descending order of the Z-score, the S-score is the difference (also in units of SD's) between the Z-score. S-score therefore represents the relative target specificity of a MAb to its intended target. A MAb is considered to specific to its intended target, if the MAb has an S-score of at least 2.5. For example, if a MAb binds to protein X with a Z-score of 43 and to protein Y with a Z-score of 14, then the S-score for the binding of that MAb to protein X is equal to 29.

SDS-PAGE Analysis of Purified Fibroblast growth factor 23 Mouse Monoclonal Antibody (FGF23/4166). Confirmation of Purity and Integrity of Antibody.

Formalin-fixed, paraffin-embedded human kidney stained with FGF23 Mouse Monoclonal Antibody (FGF23/4166).

Specificity & Comments

Fibroblast growth factor-1 (FGF-1), also designated acidic FGF, and fibroblast growth factor-2 (FGF-2), also designated basic FGF, are members of a family of growth factors that stimulate proliferation of cells of mesenchymal, epithelial and neuroectodermal origin. Additional members of the FGF family include the oncogenes FGF-3 (Int2) and FGF-4 (hst/Kaposi), FGF-5, FGF-6, FGF-7 (KGF), FGF-8 (AIGF), FGF-9 (GAF) and FGF-10 through FGF-23. Members of the FGF family share 30-55% amino acid sequence identity and similar gene structure, and are capable of transforming cultured cells when overexpressed in transfected cells. Cellular receptors for FGFs are members of a second multigene family, including four tyrosine kinases designated Flg (FGFR-1), Bek (FGFR-L), TKF and FGFR-3.

Supplied As

200ug/ml of Ab purified from Bioreactor Concentrate by Protein A/G. Prepared in 10mM PBS with 0.05% BSA & 0.05% azide. Also available WITHOUT BSA & azide at 1.0mg/ml.

Storage and Stability

Antibody with azide - store at 2 to 8 °C. Antibody without azide - store at -20 to -80 °C. Antibody is stable for 24 months. Non-hazardous. No MSDS required.

Research Areas

AKT Signaling, Breast Cancer, Cardiovascular, Infectious Disease, MAPK Signaling, Signal Transduction

Limitations and Warranty

This antibody is available for research use only and is not approved for use in diagnosis.There are no warranties, expressed or implied, which extend beyond this description. Company is not liable for any personal injury or economic loss resulting from this product.
